Another dimension with adjoined[s]

for *The Task[s] of Words in/ for *The Death Project* for **The Fictional VolunTier Project**

by Goura Fotadar

date typed up, on: 13120

[rough draft]

Include basic 1^(st) name diagram; as has/is included in general … her … here;

tag[s]: uh company -en, word analysis , reading notes, …

      I.

[same [*source, citation*:] *Valerie by Sara Stridsberg*]

Same as

title of book

"VALERIE"

obvious Val: ERIE

as in Lake Erie

considering options

Val is missing

(ley)

"Val" (ley) "ERIE"

So; "Val(ley)" Erie

notices not just possible

uh a specific valley aroun- Lake

Erie but especially its at [V= ke or rather V, ke]

least double use. since (La)

is in double use.

II.

Like; such as
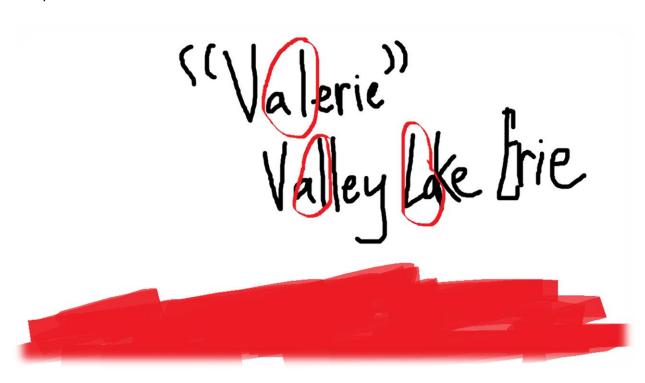

here's a valley to live in; and also as uh …

where the college town

of … is;

and-or that large company is …

"Valerie"

Valley Lake Erie

V, ke as

an order is adhered to; obvious [e].

so we have

another addition to the forced

equal V = ke

III.

V … (-ley) = ke … (?)

taking a brake

what [e] else

can also go onto /adjoined with

Lake that is such

as (-ley) and

follows

the entire

Lake

adjoined

before Erie

perhaps it's time to conside[r] (-ley) again.

 le y

el y

one thing is the derivation

of a more complete name

Valley LakeLow Erie

or maybe better additional

instruction + identification of this valley even if it's time

to construct it: Valley where the Lake something/a water type

is of low(er) what? Version of Lake Erie;

such as another dimension .
